

## Posters by Category

Bioclimatic low energy design					
Poster No	Poster Title	First Name	Last Name	Organisation	Poster-board No
102	Building Renovation, Bio Architectural Techniques and Save Energy: an applied study-case in Kore University of Enna City (Italy)	Francesco	Patania	University of Catania	1
103	microclimate perception analysis through cognitive mapping	Sanda	Lenzholzer	Wageningen University	2
105	Innovative solutions in Passive House Details	Mlechnik	Erwin	TU Delft OTB	3
107	Simulated Performance of Windcatchers within an Urban Environment	Tomas	Elizalde	UCL	4
128	USE OF WASTE AND LOW ENERGY MATERIALS IN CONSTRUCTION	Peter P	Yalley	Cardiff University	5
171	An urban office designed for the southern Brazilian climate	Marianne	Costella	Elemento 5 Bioclimatic Architecture	6
175	ENVIRONMENTAL ARCHITECTURE. PARAMETRIC DESIGN AND USERS' CHOICE.	Silvio	Caputo	Silvio Caputo / r.e.d. (AVA - UEL)	7
190	Overheating analysis of a naturally ventilated office building in a temperate climate	Hasim	Altan	The University of Sheffield	8
210	Daylighting Museums – a survey on the behaviour and satisfaction of visitors	Fernanda	Oliveira	University of Cambridge	9
225	Green Walls and their Contribution to Environmental Comfort: Environmental Perception in a Residential Building	Miguel	Sattler	Federal University of Rio Grande do Sul	10
241	BIOCLIMATICS STRATEGIES AND PRINCIPLES OF THE SUSTAINABLE CONSTRUCTION IN THE RECOVERY CENTER OF DEGRADED AREAS OF THE UNIVERSITY OF BRASILIA - BRAZIL	LIZA	ANDRADE	LASUS/FAU/UNB	11
265	Applying Numerical Simulation for Wind Availability Studies of Complex Topography and Land-Sea Phenomenon – For Urban Planning in Hong Kong	Ka Kin	Ng	The Chinese University of Hong Kong	12
266	IMPROVEMENT PROPOSAL FOR DOME HOUSES IN INDONESIA	Rika	Kisnarini	ITS Surabaya, Indonesia	13
268	Ventilation performance in a funneling window	Adolfo	Gómez Amador	University of Colima	14
269	Bioclimatic elements and design principles of the traditional architecture in northern Greece	Aineias	Oikonomou	National Technical University of Athens, School of Architecture	15
270	Water conservation in the traditional environment of the island of Sifnos, Greece	Aineias	Oikonomou	National Technical University of Athens, School of Architecture	16
282	Low-Income Housing in Lagos - Sustainable Techniques for Modular Construction	Tobi	Adamolekun	A.A	17

Bioclimatic low energy design (cont.)					
Poster No	Poster Title	First Name	Last Name	Organisation	Poster-board No
286	Assessment of Bioclimatic Applications in Buildings and the Consequent Reduction in Water Consumption when Using Evaporative Cooling Systems.	Luis Carlos	Herrera Sosa	ISTHMUS NORTE	18
293	Sustainable Daylighting Strategy of a Chinese Traditional Building: FaLun Palace of Yonghe Tibet Temple	Aiyang	Wang	Tianjin University	19
294	Prediction of Daylight Performance in Office Buildings based on LEED 2.2 Daylight Requirements	Dong-Hwan	Ko	Illinois Institute of Technology	20
300	THE EXPERIMENTATION OF IMPROVED EVAPORATIVE COOLING WIND TOWER IN REAL OFFICE BUILDING	Yasmina	Bouchahm	. Laboratory of bioclimatic Architecture and Environment (A.B.E)	21
307	Passive design for urban thermal comfort: a comparison between different urban forms in Cairo, Egypt.	Mohamad	Fahmy	University of Sheffield	22
320	Comparison of methodologies for Test Reference Year (TRY) generation for Mediterranean sites	Giancarlo	Sorrentino	Università degli Studi di Palermo	23
365	Outdoor thermal comfort modelling in Sao Paulo, Brazil	Leonardo	Monteiro	FAUUSP	24
373	Sustainability of retrofit actions in industrial buildings	Piercarlo	Romagnoni	University IUAV of Venezia	25
393	An air circulation comparative study between the application of short and long wind-catchers in a confined space: case of House VI of Vila 37	Patricia	Drach	Universidade Federal do Rio de Janeiro - UFRJ	26
397	Double-skin facade exhaustive simulation throughout combined thermal and daylight modelling. Application to optimal control	Valentin	Gavan	Centre de Thermique de Lyon (CETHIL)	27
411	Thermal characteristic of building envelope in revitalized post-industrial buildings	Dariusz	Heim	Technical University of Lodz	28
424	Passive and low energy architecture of hammams in the Mediterranean	Jean	Bouillot	JB Architecture	29
434	Cave dwelling in China	Jean	Bouillot	JB Architecture	30
454	Ecological optimisation of thermal insulation	Zsuzsa	Szalay	UCD Energy Research Group	31
475	DAYLIGHTING DESIGN FOR LOW ENERGY BUILDINGS IN SOUTH ITALY	Sergio	Sibilio	Facoltà di Architettura	32
479	A Quick Design Approach towards the Energy Efficient Buildings in Pakistan.	Sabahat	Alamgir	University of Engg. & Tech., Lahore.	33
483	San Pedro National Park Zero Energy Plan	Anibal	Figuroa	Universidad Autónoma Metropolitana	34
505	Sick Building Syndrome in a University Building – An Educational Survey	Isaac	Meir	Ben-Gurion University	35
523	Sustainable architecture for horses	Juan	Gonzalez Calderon	Onarquitectura	36
531	OUTDOOR COMFORT IN OPEN SPACES : PROPOSAL FOR A QUICK EVALUATION METHOD	Joelle	Goyette-Pernot	University of Applied Sciences of Western Switzerland	37

Bioclimatic low energy design (cont.)					
Poster No	Poster Title	First Name	Last Name	Organisation	Poster-board No
546	High Altitude Design; Optimising Residential Architecture in the Alborz Mountains, Iran	Yasamin	Arbabi	KPF	38
570	FROM GREEN BUILDING TO SUSTAINABLE URBAN SETTLEMENTS: A NEW ASSESSMENT METHOD	Fazia	Ali-Toudert	University of Dortmund	39
575	Low energy dwelling: Is it possible to build with low embodied energy and have a passive solar House?	Genevieve	Jones	Robert Gordon University	40
618	Thermal performance of an office building with a double skin façade in a Mediterranean climate.	Waldo	Bustamante	P Catholic University of Chile	41
635	THERMAL PERFORMANCE OF A VEGETATED WALL DURING HOT AND COLD WEATHER CONDITIONS	Ioannis	Tsiros	Agricultural University of Athens	42
648	Evaluation of the radius of influence of different arboreal species on microclimate provided by vegetation	Lucila	Chebel Labaki	University of Campinas	43
652	Applying sustainable renovation policies to buildings: Are we missing a step?	Erika	Mata	Escola Tècnica Superior Arquitectura Vallès	44
665	Building Material Selection and Air Quality in Healthcare Design: A Survey of the Design and Construction Industry	Kelly	Cook	University of Kansas	45
672	Recycling and Vocational Education Center designed with Low Human and Environmental Impact Principles	Joana Carla Soares	Gonçalves	Faculty of Architecture and Urbanism, University of São Paulo, BR	46
680	A Modern use of cooling systems which being used in Iranian traditional wind-catcher (Ba'd-gir)	Farzin	Haghparast	Tabriz Islamic Art University	47
682	A Study on Daylighting Internally Reflected Component - Correlation Between Theoretical and Real Architecture Models	Fernando Oscar	Rutkay Pereira	Federal University of Santa Catarina	48
728	Indoor Air Quality in French Educational Buildings	Agota	Szucs	LEPTIAB Université de La Rochelle	49

Zero Energy Building					
Poster No	Poster Title	First Name	Last Name	Organisation	Poster-board No
110	Towards a zero energy house strategy fitting for south Iraq climate	Amjad	Almusaed	ARCHCREA	50
131	Indicator for Sustainable Housing Design: from EcoHomes to the Code for Sustainable Homes	Bing	Chen	University of Sheffield	51
142	Energy Performance Benchmarking (EPB): a system to measure building energy efficiency	Stephen	Sharples	University of Sheffield	52
263	Zero energy renovation of Nemavo-Airey dwellings: a ventilation concept based on occupant behaviour	Michiel	Ham	Eindhoven University of Technology	53
323	Climate-robust design of zero energy buildings with aquifer thermal energy storage	Kees	Wisse	DWA installation and energy consultancy	54
362	Indoor climate control effect of AAC panels as determined by house model measurements and simulations	Yuko	Tsukiyama	ASAHI KASEI HOMES CORPORATION	55
529	Climatic Study of cold dwelling (Case study: Hamedan city)	Faezeh	Etemad Sheikholeslami	Buali Sina University	56
554	The economics of extremely low energy dwellings: how far can we go?	Griet	Verbeeck	University College of the Province of Limbourg	57
566	THERMAL AND ENERGETIC ANALYSIS OF A PRECAST PANEL FOR INDUSTRIAL BUILDINGS	RAFFAELLO	POSSIDENTE	SECONDA UNIVERSITA' DI NAPOLI	58
597	ARCHITECTURAL DESIGN AND ENERGY ANALYSIS OF A COMPLEX OF RESIDENTIAL BUILDINGS IN PARIS	Giacomo	Salvadori	Dipartimento di Energetica - Università di Pisa	59
607	Sustainable Housing Development: Design Towards Zero Energy For Space Heating	Ai Tee	Goh	University of Liverpool	60
634	Environmentally Sensitive Building Extensions and the Progression to Zero Carbon Existing Buildings	Adrian	Pitts	Sheffield Hallam University	61
678	The Evolution of Energy Efficiency Policy in Germany and the EnEV 2007	Marlon	Leão	Technical University Braunschweig	62

Design Process and Evaluation					
Poster No	Poster Title	First Name	Last Name	Organisation	Poster-board No
132	Sustainability-related Educational Programmes for Sustainable Housing Design	Bing	Chen	University of Sheffield	63
137	A sustainability evaluation method: the former Italgas Media Village's case study	Elena	Montacchini	Polytechnic University of Turin	64
139	A New Occupant-Centric Metric for Building Energy Performance	Ahmad	Barclay	RMJM Architects	65
150	Bridging the gap between energy efficiency and comfort: a design strategy for the Mediterranean areas.	Antonella	Mazzeo	Università Mediterranea degli Studi di Reggio Calabria	66
162	THERMAL PERFORMANCE EVALUATION METHOD FOR LOW COST SINGLE-FAMILY ONE-FLOOR HOUSING FOR PORTO ALEGRE - BRAZIL	Miguel	Sattler	Federal University of Rio Grande do Sul	67
193	Estimating Average Sky View Factors of Urban Surfaces with Simple Geometric Parameters	Koen	Stemers	University of Cambridge	68
231	Integral Sustainable Building Design Workshops in professional practice	Marinus	Van Houten	Technical University Eindhoven	69
264	Zero Energy Housing with low environmental impact: The Trias Materia	Michiel	Ham	Eindhoven University of Technology	70
315	Energy performance calculation methods for the Italian existing dwellings: a comparison	Michele	Zinzi	enea	71
341	341: Potential for the implementation of evaporative cooling in a subhumid warm climate through the use of the humidex index.	Pablo	Elias	Universidad Autónoma de Tamaulipas	72
381	Numerical analysis of convective heat transfer coefficient in building façades under the action of the wind	Cristina	San Juan	CIEMAT	73
385	School buildings as learning tools: guidelines for the eco-efficient renovation project	Silvia	Tedesco	Polytechnic University of Turin	74
404	Dynamic simulation of a passive house in different locations in Italy	Alessia	Giovanardi	Eurac research	75
442	7 Fountains Primary School Post-occupancy Evaluation	Paul	Carew	PJCarew Consulting	76
447	Numerical study on thermal and fluid dynamic behavior of an open-joint ventilated façade	Cristina	San Juan	CIEMAT	77
486	Daylight simulation in buildings	Silvia Garcia	Tavares	Universidade Federal do Tocantins	78
499	Use of simplified tools to evaluate thermal comfort in urban spaces in the teaching experience	Valentina	Dessi	Polytechnic of Milan	79
555	SOLAR RADIATION MODELING IMPACT ON CONTROL STRATEGIES DESIGN	Mohamed	El Mankibi	ENTPE-DGCB	80
602	Integrating the perceptual dimension into decision support tools related to the environmental quality of materials.	Nathalie	Tornay	Grecau	81
675	Defining an Architectural Typology for the Urban Farm	Tiffany	Broyles	Kohn Pedersen Fox Associates PC	82

Innovative Materials, Components and Systems					
Poster No	Poster Title	First Name	Last Name	Organisation	Poster-board No
144	First results of a BIPV Project in Romania	Laurentiu	Fara	Politehnica University of Bucharest	83
188	Fine-wire heat exchanger can effective heat and cool	Jon	Kristinsson	kristinsson architectural engineers	84
232	Integral design of sustainable energy into buildings: from synergy to Flexergy	Marinus	Van Houten	Technical University Eindhoven	85
322	Evaluation of sustainable performances for the “rammed earth” material. A case study in Abruzzo Region, Italy	Luca	Buoninconti	University Federico II – Naples	86
328	NEW BUILDING COMPONENTS FROM AN ANCIENT MATERIAL: BAMBOO	Irene	Caltabiano	Politecnico di Torino	87
337	Individual user behaviour leading factor agent comfort control technology	Marinus	Van Houten	Technical University Eindhoven	88
346	Developing a Low Cost, Sustainable Housing Prototype Using Recycled Waste Materials in Tijuana, Mexico	Matthew	West	Cal Poly Pomona	89
433	Construction methods which can achieve A3 rating at minimal extra cost.	James	Pike	O’Mahony Pike Architects	90
448	Efficient structural roof form as a tool for energy savings in building design	David	Pearlmutter	Ben-Gurion University	91
468	An Energy Autonomous Building	Agapi	Fylaktou-Cattaneo	Fylaktou-Cattaneo	92
545	Daylight control in Art Galleries through dynamic inter-reflection	Giles	Bruce	BDSP Partnership	93
576	Embedded Stone Wall Construction in Lisbon	Silvia	Pelham	Faculdade de Arquitectura – UTL	94
584	Advanced Decentralized Ventilation: How Wind Pressure Can Be Used to Improve System Performance and Energy Efficiency	Luca	Baldini	ETH Zurich, Building Systems Group	95
647	Exergy recovery from warm wastewater for an integrated low exergy building system	Forrest	Meggors	ETH Zurich	96
700	Energy Demand Reduction Applying Different Window Areas and Performance Glasses in Brazil	Marlon	Leão	Technical University Braunschweig	97

<b>Building Assessment and the Occupant</b>					
<b>Poster No</b>	<b>Poster Title</b>	<b>First Name</b>	<b>Last Name</b>	<b>Organisation</b>	<b>Poster-board No</b>
117	Some Trials for Heating & Cooling-Free Housing in Sapporo, Hokkaido	Masamichi	Enai	Hokkaido University	98
138	Challenge of Vernacular Architecture and Modern Life Style – Case Study in Iran	Shahrbanoo	Djalilian	Shahid Beheshti University	99
187	Assessment and evaluation of the thermal and acoustical conditions in traditional bath buildings	Kri stina	Orehounig	Vienna University of Technology	100
278	Building energy performance considering post occupancy: a case study of an innovative academic research building	Eirini	Tsianaka	RMJM Architects	101
285	Hourly Thermal Neutral Temperatures of Natural-Ventilated Buildings in Colima, Mexico.	Gabriel	Gomez-Azpeitia	University of Colima	102
408	Adaptive comfort and climate-sensitive architecture: How occupants feel in their homes?	Carolina	Ganem	INCIHUSA-CONICET and ETSAB-UPC	103
421	Lighting control system: energy efficiency and users' behaviour in office buildings	Michela	Chiogna	University of Trento	104
463	INFLUENCE OF THERMAL MASS IN THE FAÇADE ON THERMAL BEHAVIOR OF RESIDENTIAL BUILDINGS IN THE MEDITERRANEAN CLIMATE.	Marco	Massetti	La Salle – Ramon Llull University	105
574	The Study of a Market Building Design Concerning the Thermal Comfort Improvement	Religiana	Hendarti	Trisakti University	106
589	Energy and Carbon Emission Savings due to Hybrid Ventilation of Office Buildings in Arid Climates	Sherif	Ezzeldin	De Montfort University	107
637	Low energy dwellings in Greece according to the Passive House Standard	Phaethon	Psichis	Earth Architecture ltd	108
681	Environmentally Responsive Architecture; Passive Design for School in Southern India	Varun	Kohli	SOM	109
687	The 'Pleasant' Temperature –Window Manipulation and Dynamics of Thermal Comfort in a Naturally Conditioned Space	André	Potvin	Université Laval	110
